CASTLE HOT SPRINGS
EST • 1896

SMALL LUXURY HOTELS OF THE WORLD

OVERVIEW

Castle Hot Springs was Arizona's first luxury resort that opened in 1896, a Western hideaway that once played host to presidents, tycoons, and captains of industry—it is now established as an inclusive retreat among the best boutique hotels in the West.

The 34-room property is open seasonally and offers guests an authentic and innovative hospitality experience that revolves around the pursuit of relaxation and revitalization. At the epicenter of the 1,100-acre ranch property are the magnificent thermal hot springs, which emit from the earth at 115 degrees Fahrenheit, cascading into three pools of varying temperatures for the exclusive enjoyment of resort guests.
